

The entire world of high pressure cleaning

COMPETENCE IN CLEANING

HIGH PRESSURE CLEANING

The big WEIDNER-programme for cleaning & cleanliness

Introducing the big WEIDNER catalogue with the complete product range for both cleaning and cleanliness. There are many elements which speak for the increasing success of our products.

Quality to the last detail!

Since 1918 the trademark WEIDNER is well known for high quality and solid reliability. »Satisfied customers ensure tomorrow's success!« Constant checking of materials and strict production controls ensure the high quality standard.

Specialist advice!

The innovation of WEIDNER's products suits our customers requirements and necessity. Our customers receive a quality product that is tailored for their individual demands. Many factors must be considered during a good consultation; will the product be used in the private or in the trade area? Which accessories are suitable for the purpose? Is the appliance subjected to extensive use, i.e. professional cleaning companies? The professional advice from our specialists protects against wrong decisions and therefore prevents difficulty.

Safety!

WEIDNER products comply, of course, with international safety regulations. The safety tests in the electrical and mechanical areas are confirm the measurement undertaken by us for the safety of our products during daily use.

The most up-to-date technology!

Our customers expect products which are distinguished by exceptional application features, which confirm our endeavours for technical advance. Comfortable handling, safety features and the economical running costs are the clear-cut features of the WEIDNER technology.

Ergonomics!

The human being is at the centre when it comes to the development and construction of modern machines and tools. In the interests of health and for the prevention of unnecessary burdens, the discoveries of modern work medicine are considered in the product design.

Environmental awareness!

With WEIDNER not only the effective economy of our products counts, we also endeavour to reduce the burden to a minimum. Measurement of noise are reduced, usage of recyclable raw materials where possible, effective lowest energy consumption at a high degree, the use of bio-degradable cleaning agents and water and energy methods etc., are put in to practice.

Service!

A fast and reliable service is obligatory for us. The most important serviceable parts are stocked and are usually available to you on site within 24 to 48 hours. The WEIDNER service technicians are carefully trained. This way repairs are carried out with the utmost efficiency and cost effectiveness. The catalogue shows the diversity of our range. The most important information and capacity data is clearly allocated to the individual product groups. The extensive range of accessories shows clearly the flexibility of our products.

If you have further questions do not hesitate to avail of the advisory service of our distribution partner or the advisory service of our factory. We will demonstrate our products on request.

WEIDNER has the complete programme for high pressure cleaning and cleanliness. The individual product families are illustrated and described in the following pages.

HIGH-PERFORMANCE:

Powerful and long-lasting traction drive unit and powerful drive units warrant enough power and strength for all cleaning tasks.

MAINTENANCE FRIENDLY:

Good accessibility at all prefabricated parts make the replacement children's game.

ROBUST:

Our equipments are robust and solid by means of qualitative high value and by use of best materials.

EFFICIENT:

The compact construction and the optimum drive- or suction unit make Weidner equipments efficient, powerful and variable applicable.

USER FRIENDLY:

Well thought-out ergonomology warrants user comfort by all machines.

To give a better overview, the product ranges have been divided in 3 groups:

- Recommended for semi professional use
- Products for business and industrial applications
- Products for daily, industrial cleaning applications

Anti-Twist-System – swivel to prevent hose twisting

Time-Delayed-Stop – time delayed, pressure free stop

Stepless pressure adjustment at the high pressure pistol

Dry Steam Cleaner, oil heated

DAS300 LXTS/KXTS

For large applications – industrial, environmentally friendly and powerful

USER FRIENDLY

- Clear and easy
- Easy transport through tandem axle
- Air inflated tyres
- LED-system control with light diodes

MAINTENANCE FRIENDLY

- Easy access to all components

ROBUST

- Frame out of metal
- Cover out of stainless steel

HIGH-PERFORMANCE

- Slow running 3 ceramic plunger pump
- Industrial motor 100% S1

EFFICIENT

- Compact construction
- Industrial accessories
- Low water consumption
- System temperature up to 185°C
- Addition of compressed air

Application areas:

- Paper industry
- Food industry
- Miscellaneous industrial cleaning (print-, stamp-, milling-CNC machines)
- Cleaning of historical buildings and monuments

Model	DAS300 LXTS	DAS300 KXTS
Order-No.	DAS300 LXTS - 013	DAS300 KXTS - 013
Max. operating pressure [bar]	16	16
Max. flow rate by dry steam [l/min]	0,9	0,9
Max. flow rate by moisture steam [l/min]	2,0	2,0

Waschboy 132/162 LXTR

For medium size jobs – robust and powerful in a tubular frame

USER FRIENDLY

- Clear and easy
- Chassis to hang up is optional available

MAINTENANCE FRIENDLY

- Easy access to all components

ROBUST

- Steel frame out of robust metal, plastic coated

HIGH- PERFORMANCE

- Slow running plunger pump with 3 ceramic plungers
- Industrial motor S1 class

EFFICIENT

- Compact construction
- Miscellaneous industrial accessories
- Thermostat protects the pump from overheating

High Pressure Cleaner unheated with petrol engine

Waschboy 152 B

For medium sized applications – robust and
powerful in tubular steel frame

USER FRIENDLY

- Clear and easy
- Chassis to hang up is optional available

MAINTENANCE FRIENDLY

- Easy access to all components

ROBUST

- Frame out of metal

HIGH-PERFORMANCE

- Slow running plunger pump with 3 ceramic plungers
- HONDA 4 stroke engine with low oil cut out

EFFICIENT

- Compact construction
- Reduction gear box 2:1
- Miscellaneous industrial accessories
- Automatic rotation reduction if gun is closed
- Suction through slow running pump is possible

Model	Waschboy 152 B
Order-No.	HKY 152 BXT
Max. pressure [bar]	150
Max. flow rate [l/h]	660
Power [kW]	5,5 PS 4 - stroke HONDA GX 160
Max. water temperatur [°C]	50
High pressure pump	plunger pump with 3 ceramic plungers
Rotation [r/min]	1750
Detergent supply	Injektor pressure side, infinitely adjustable
Measurement (lxwxh) [mm]	300x430x430
Weight [kg]	40

Hot water module

Waschbär 2020 Aquatherm

For special application – industrial, robust and powerful

USER FRIENDLY

- Clear and easy
- Air inflated tyres

MAINTENANCE-FRIENDLY

- Easy access to all components

ROBUST

- Chassis made of tubular frame
- Stainless steel cover

HIGH-PERFORMANCE

- Slow running plungerpump with 3 ceramic plungers
- Industrial motor 100% S1

EFFICIENT

- Compact construction
- Miscellaneous industrial accessories
- Separate ventilation power
- Fuel oil cut out switch
- Vertical heating coil with high degree of efficiency

Modell	Waschbär Aquatherm 2020
Order-No.	HKW AT 2020
Max. operating pressure [bar]	240
Max. flow rate [l/h]	1260
Power [V/Hz]	1 - 230 V / 50 Hz

** by flow rate reduction

High Pressure Cleaner unheated

Waschboy 320 E

For big applications – industrial, robust and powerful

USER FRIENDLY

- Clear and easy
- Super elastic tyres

MAINTENANCE FRIENDLY

- Easy access to all components
- Large dimensioned water filter

ROBUST

- Frame out of tubular metal

HIGH-PERFORMANCE

- Slow running plunger pump with 3 ceramic plungers
- Industrial motor 100 % S1 class

EFFICIENT

- Compact construction
- Miscellaneous industrial accessories
- Thermovalve protects the pump from overheating
- Star delta switch with power protection

Application areas:

- Barking of the tree trunk
- Vessel's cleaning
- Cleaning of monuments and building stones
- Reconstruction of buildings and concrete
- Cleaning of construction vehicles

Model	Waschboy 320 E
Order-No.	HKY 320 ENP
Max. pressure [bar]	320
Max. flow rate [l/h]	1260
Power [kW]	15,0 kW S1 Industrial motor

High pressure cleaner stationary unheated

WR 115 / 123 / 215 / 223

For medium and big applications
– industrial, robust and powerful

USER FRIENDLY

- Clear and easy
- Stationary high pressure cleaning system for floor or wall mounting

MAINTENANCE FRIENDLY

- easy access to all components

ROBUST

- Frame out of stainless steel

HIGH-PERFORMANCE

- Slow running CAT pump with 3 ceramic plungers
- Industrial motor 100 % S1

EFFICIENT

- Compact construction
- Miscellaneous industrial accessories
- Big dimensioned water feed line tank
- Time delayed pressure free total stop
- Possible to connect to several drop points
- Pump and motor separated by coupling housing

Optional functions:

- 1 detergent pump, dosing directly into the holding tank
- 1 detergent supply dosing pump via flow water control / remote control operation via remote control with turning switch operation via remote control with push buttons
- Time relays for total Stop (adjustable)
- Version with SPS mini computer for following safety functions
 - dry running protection
 - Pressure switch is permanent controlled for functional capability total stop of the SOYWR after 10 minutes
 - Automatic cut out by malfunctioning of the pressure switch, flow water control and by leaky pressure system

High Pressure Cleaner stationary unheated

Combi 250

For big applications
– industrial, robust and powerful

USER FRIENDLY

- Clear and easy
- Stationary high pressure cleaning device for floor or wall mounting optional available

MAINTENANCE FRIENDLY

- Easy access to all components

ROBUST

- Frame out of stainless steel
- Cover out of stainless steel

HIGH-PERFORMANCE

- Slow running CAT pump with 3 ceramic plungers
- Industrial motor 100 % S1

EFFICIENT

- Compact construction
- Miscellaneous industrial accessories
- Big dimensioned water feed line tank
- Time delayed pressure free total stop
- Possible to connect to several drop points
- Pump and motor separated by coupling housing

Optional functions:

- 1/2 detergent pump dosing with 4,6 L/h EPDM or Viton
- Total stop via time relays with adjustable turn-off time
- Winter freezing protection with lost water or circulated water
- Switch over cold/hot water
- Booster pump for higher water temperatures
- Stainless steel version V4A for aggressive water
- Version with SPS mini computer for following protective functions
 - Dry running protection
 - Pressure switch is permanent controlled for functional capability
 - Total stop of the SOYCC after 10 minutes
 - Automatic cut out by malfunctioning of the pressure switch, flow water control and by leaky pressure system
 - Pressure switch, flow water control or leaking system

High Pressure Cleaner stationary unheated

CM 3000

For large applications – industrial, robust and powerful

USER FRIENDLY

- Clear and easy
- Stationary high pressure cleaning system for floor installation

MAINTENANCE FRIENDLY

- Easy access to all components

ROBUST

- Frame out of metal
- Cover out of stainless steel

HIGH-PERFORMANCE

- Slow running 3 plungers CAT pump
- As from 2 to 6 pumps available
- Industrial motor 100% S1

EFFICIENT

- Compact construction
- Miscellaneous industrial accessories
- Big dimensioned water feed line container out of stainless steel
- Time delayed total stop system
- Water shortage security device
- Control via microprocessor (SPS control)
- Connection with several supply drop points
- Pump and motor separated by clutch housing
- Alteration start warrants equal operating hours

Optional functions:

- As from 2 to 6 pumps available
- Automatic start system (after technical clarification)
- Winter freeze protection (after technical clarification)
- Switch over cold/hot water
- Complete in stainless steel version V4A for aggressive water
- Spezial SPS computer programs tailored to the cleaning task
- Versions with other pump types volume or different pressure possible
- Special versions for other special applications are possible
- Single operation of each HP pump with 1 or 2 detergent dosing pumps with 4,6 L/h EPDM or Viton

Model	CM 3000	CM 3000

Heating Unit Processwater Boiler

For fuel, oil or gas operation

USER FRIENDLY

- Simple operation
- Clear operating and control instruments

MAINTENANCE FRIENDLY

- Easy access to all components
- Clear design in components

ROBUST

- Tank integrated in tank system, processwater tank out of stainless steel
- No need for protect anode
- Hygienic and maintenance free due to stainless water tank

HIGH-PERFORMANCE

- Compact space-saving design
- Large surface area of the heat exchanger warrants excellent heat exchange of the tank in the tank system

EFFICIENT

- High constant degree of efficiency
- Limescale protection at the tank walls, thus at all times excellent, fast heat transfer
- Protection of bacteria due to hot water temperature over 60 °C

High Pressure Cleaner stationary heated

CS 2000

For large applications – industrial, robust and powerful

USER FRIENDLY

- Clear and easy
- Stationary high pressure cleaning device for floor or wall mounting optional available

MAINTENANCE FRIENDLY

- Easy access to all components

ROBUST

- Frame out of steel, plastic coated
- Cover out of stainless steel

HIGH-PERFORMANCE

- Slow running 3 ceramic plungers pump
- Industrial motor 100 % S1

EFFICIENT

- Compact construction
- Miscellaneous industrial accessories
- Large dimensioned water feed line tank
- Time delayed pressureless total stop system
- Serially including water shortage protection, total stop and flame control
- Control via microprocess (SPS control)
- Possible to supply with several drop points

Model	CS 2000
Order-No.	SOY CS 120 WP-002
Max. operating pressure [bar]	200
Max. flow rate [l/h]	1000
Power [kW]	6,6 kW S1 Industrial motor

Special Cleaning Equipments

Cleaning systems for special cleaning tasks according to customer requirement

- WEIDNER plans, develops and manufactures High Pressure Cleaning Systems and special cleaning equipments for specific cleaning tasks.
- Surely we manufacture also cleaning systems according to customer request.
- Our experience in such special cleaning equipments has more than 30 years history.
- WEIDNER equipments are worldwide industrial deployed in daily applications at hard continuous operations.

USER FRIENDLY

- Simply clear functional equipment construction
- Directly controlled at the cleaning device via remote control or at the operation monitor, menu guide in clear text, simple and understandable
- Fully automatic cleaning sequences depending at the cleaning task

MAINTENANCE FRIENDLY

- High quality high pressure pumps
- High quality materials for plungers and seals
- Slow running high pressure pumps
- Exact adjusted power to the cleaning task

ROBUST

- Industrial, robust and powerful
- Simply solid compact construction according to German quality
- Equipment are made completely in stainless steel A2 and A4, also for VE water
- Equipment designed for hard permanent operation as well as for multishift operation
- Control of the the bypass flow automatically function control of the pressure regulation system

HIGH-PERFORMANCE

- Various hp-pump system depending at the application case
- Working pressure adjustable via the high pressure nozzles
- Volume flow, working pressure via frequency converter infinitely adjustable
- Industrial motor 100 % S1

EFFICIENT

- Economically operation of the cleaning device
- Pressure and water volume are optimum adapted at the cleaning task
- SPS control with automatic program operating sequence warrants an optimum cleaning application
- Cleaning jobs can be visually indicated via monitor

Full-automatic cleaning system for IBC containers.

High pressure pump aggregate for high pressure cleaning.

Control and regulation elements of cleaning system.

Multiple pump equipment.

Descaling of strang casting.

4 pump equipment with different dosing system.

Special Cleaning Equipments

Under chassis cleaning equipment

Automatically cleaning of vehicles/rail vehicles.
Under chassis cleaning of vehicles and rail vehicles.

USER FRIENDLY

- Simple clearly construction
- Operation via remote control, or tele control or light barrier

MAINTENANCE FRIENDLY

- By using high pressure centrifugal type pumps
- Or slow running high pressure plunger pumps

ROBUST

- Industrial, robust and powerful
- Easy solid compact construction in industrial quality
- High pressure centrifugal pump out of stainless steel
- Slow running high pressure plunger pump

HIGH-PERFORMANCE

- Various pump systems depending on requirement
- Volume to be adjusted via nozzles (centrifugal pump)
- Via high pressure nozzles (plunger pump) adjusted working pressure
- Industrial motor 100 % S1
- 3 or 4 jet nozzle spinner in stainless steel, with rotating high pressure and jet nozzles

EFFICIENT

- Economical operation of the cleaning equipment by optimal lay out of the underchassis cleaning equipment
- Pressure and water volume are perfectly adapted to the cleaning task

Interior cleaning of rail coaches transport waggons.

Chassis cleaning of construction vehicles.

Under chassis cleaning of construction vehicles.

Chassis cleaning and tank of a diesel locomotive.

Result after cleaning.

Special Cleaning Equipment

Tank cleaning by close loop system. Electric or steam heated

For tank cleaning in a close loop system.
For difficult to clean products such as Latex, Acronal, Primal, Plextol, Butrafon, Diofan, Poligen, Styrofan, Vinnpas, Epoxide resin, Rubber.

- USER FRIENDLY**
- Clearly control panel
 - Fully automatic cleaning procedure
 - Hour meter for the actual cleaning time reset table to „0“
 - Hour meter for the total operating hours.

- MAINTENANCE FRIENDLY**
- Easy access to all components
 - Low maintenance, minimum service required
 - All filter meshes and filter baskets can be manually taken out

- ROBUST**
- Frame made out of square pipe stainless steel 1.4571 A4
 - Tank made of 1.4571 stainless A4 material
 - Filter mesh, filter basket made of stainless steel 1.4571 A4
 - Centrifugal type pump made of stainless steel 1.4571 A4

- HIGH-PERFORMANCE**
- Operation up to 2 container cleaning head, simultaneously, possible
 - With one tank interior cleaning head for 20'/30' container
 - With additional equipment, cleaning of rail wagon container possible

- EFFICIENT**
- Compact construction
 - Easy and solid assembly
 - Robust in handling and operation
 - Multi use of the detergent
 - Low discharge costs due to multi use of the detergent
 - For example materials like some Latex types do not become dissolved, but become loosening in pieces from the tank internal area and get separately disposed

Tank cleaning head at a 20' container during cleaning.

Loose latex parts after cleaning.

Operating panel close loop cleaning system LCS.

Special Cleaning Equipment

Container interior cleaning equipments

- Container interior cleaning of industrial products,
- Container interior cleaning of all kinds of foodstuff.
- For the container interior cleaning of drums IBC-container
- Small containers and tanks until approx. 30.000 liter container capacity.

As well as for the industrial tank and container cleaning of:

- Storage container
- Process container
- Stirring- and mixing container
- Fermentation and ripe container
- IBC-container

- USER FRIENDLY**
- Easy clear handling
 - Existing of few simple standard components

- MAINTENANCE FRIENDLY**
- Easy access to all components
 - Low maintenance high pressure pumps

- ROBUST**
- Solides appropriate adjusted cleaning concept
 - Manufactured in standardised module design, robust and powerful
 - Pumps also in complete stainless steel available
 - Designed for the hard continuous operation also for multiple shift operation.

- HIGH-PERFORMANCE**
- Optimum cleaning power due to the exact adapted working pressure/water volume at the cleaning task
 - Working pressure of the container cleaning head is adjustable
 - Rotation speed of the high pressure nozzles is adjustable
 - Container cleaning head is completely made of stainless steel
 - Container cleaning head also explosion proof

- EFFICIENT**
- The outcome is due to the optimisation of pressure, water volume and rotation speed at the cleaning task is automatically:
- Economical water consumption
 - Economical consumption of heating energy
 - Save sewage water
 - Save electrical energy consumption
 - Save time and money
 - Fast cleaning cycle with each container cleaning
 - Raising off he equipment efficient degree
 - Environmentally energy balance

Dirty tanks with hardened products before cleaning.

Cleaned tanks after full automatic cleaning procedure.

Interior cleaning food grade tank.

Interior cleaning IBC.

Tank interior cleaning equipments

Tank interior cleaning of industrial products.

Tank interior cleaning of all kind of food stuffs.

For tank cleaning of road tanks with 20' or 30' dimension.

As well as industrial cleaning of:

storage tanks, process tanks, mixing tanks, IBC-tanks

Or for cleaning of railway container tanks, for special tank interior cleaning up to 1000 bar.

USER FRIENDLY

- Clear operation over the monitor
- Or at the explosion proof remote control
- Clear overview of the cleaning procedure on the monitor
- Automatic control of all important parameters
- Fully automatic cleaning procedures through cleaning programs which can be done anytime by the customer himself

MAINTENANCE FRIENDLY

- Easy access to all components
- Low-maintenance high pressure pumps
- Tele-maintenance of the control mode via modem

ROBUST

- Solid appropriate equipment concept/ and equipment construction
- Industrial modular construction, made in Germany, robust and powerful
- Pumps on request, completely in stainless steel available
- Conceived for hard continuous working also in multi-shift operation
- The whole system can be build into container, with factory trial run

HIGH-PERFORMANCE

- Optimal cleaning results, due to the exact adopted working pressure/water quantity to the cleaning task
- Water volume of the individual cleaning head is adjustable
- Tank cleaning head is complete out of stainless steel, without electrical external drive. Tank cleaning head, also in explosion proof available
- Working pressure as from 50-max. 500 bar in Ex-proof sector possible.
- Until 1000 bar for special tank cleaning in which incrustated material can be properly cut

EFFICIENT

- Due to the optimizing of pressure and water quantity of the cleaning task:
- Saving of water consumption
 - Saving of heating energy
 - Saves waste water
 - Saves time and money
 - Fast operating sequences by each tank interior cleaning
 - Increasing of the equipment efficiency factor
 - Environmentally friendly, energy balance

Tank interior cleaning system built into a 40' container. To clean up to 2 containers at the same time.

Tank cleaning station in Asia region for tank trucks and containers.

Tank cleaning head TIK 2000 complete out of stainless steel with constant rotation. By cold or hot water operation. For the cleaning of road tankers, tank containers or other tanks with foodstuff or industrial products. The cleaning head is explosion proof.-

Dirt water of rail coach during cleaning.

Tank cleaning station for interior cleaning of tank containers.

Rail coach during interior cleaning.

Machine room tank interior cleaning of rail coaches 800 bar.

Tank cleaning station for interior cleaning in a cargo center.
